Second-Year I Group Participants

Pre-NTI Assignment and Items to Bring to NTI

As a second-year participant, your focus will be on: Course 20 "Designing, Developing, and Delivering Instruction" and Course 21 "Introduction to Instructional Technology".

The Year-Two Experience will provide you with information to develop instructional materials for your own teaching situation. Not only will you have the opportunity to present to your peers, you will also observe and evaluate presentations from fellow JATC instructors. To aid in the development of the culminating lesson that you will be presenting to the class, you may choose to bring support materials such as special tools, reference materials, lesson plans, etc. A Milwaukee Packout with tools and materials will also be available for your use.

What to bring:

To get the most out of the week, consider the following list of items.

- Laptop computer running the current version of the operating system (example: Windows 10 or newer preferred) and 802.11 wireless capability - **required**
- Microsoft Office (Word, PowerPoint, and Excel)
- It would be very helpful to be familiar with:
  - the fundamentals of MS Word, PowerPoint, and Excel
  - basic file operations (copying files from one storage media to another),
  - Windows desktop and menu system
  - navigating the Internet

Note: Your first class will begin on Sunday at 10:00 a.m. Class schedule, shuttle schedule and other event information for NTI are available in the ProTech Skills Institute Events app (PTSI Events) or Event Guide.
