

# KEVIN R. JOHNSON

*Training Director/CFO*

**Electrical Training Institute- San Diego & Imperial Counties**

---

Kevin Johnson serves as the **Training Director and CFO at the San Diego & Imperial County Electrical Training Institute**, where he has played a pivotal role in shaping the future of electrical education alongside industry leaders. With a rich background that began with an apprenticeship in San Antonio, Texas, Kevin's journey in the electrical field has been marked by continuous growth and leadership. His transition from apprentice to a celebrated graduate in San Diego underscores his commitment to excellence and leadership within the trade.

Kevin's career trajectory has seen him evolve from an apprentice to a key figure in management, taking on roles that span from General Foreman to Pre-Construction Manager overseeing value engineering and project management. His expertise not only lies in hands-on electrical work but also in nurturing the next generation of electricians as an **accredited instructor at the San Diego Electrical Training Institute and adjunct faculty at Palomar College**. Kevin's dedication to education is further evidenced by his completion of the prestigious 4-year National Training Institute for Instructors.

Beyond his contributions to education, Kevin actively engages with the broader community through his roles as **Treasurer/Secretary for the San Diego Apprenticeship Coordinators Association, Chairman for the California Electrical Training Directors Association**, and an **instructor for the National Training Institute**. His commitment extends to being an apprenticeship ambassador for the Department of Labor and a board member for the San Diego Workforce Partnership.

At the heart of Kevin's philosophy is a firm belief in the power of apprenticeship as the cornerstone of trade professions, viewing it as a critical pathway for nurturing future leaders and owners within the industry. His vision and efforts are dedicated to empowering the next generation with the skills, knowledge, and leadership needed to excel in the electrical field.
